

HENRIQUE JENSEN

Frontend Architect & Technical Leader

Brazil | linkedin.com/in/henriquejensen | github.com/henriquejensen

PROFILE

Software engineer with 10+ years of experience designing scalable frontend platforms, multi-brand design systems, and accessible digital experiences. Technical leader focused on architecture direction, mentoring, documentation, and connecting engineering decisions with business goals.

SELECTED IMPACT

- Defined shared frontend foundations for multiple applications and brands using an Nx monorepo, reusable libraries, design tokens, Storybook, and visual testing.
- Helped embed accessibility into kiosk architecture through alternative-device navigation, focus management, text-to-speech, and hardware event integration.
- Made technical direction visible through architecture documentation, presentations, standards, mentoring, and cross-functional collaboration.

EXPERIENCE

DENTSU

Frontend leadership & architecture

Platforms, design systems, accessibility, architectural foundations, mentoring, and documentation.

TRYBE

Full-stack development & education

Web development, collaborative engineering, technical education, and mentoring.

DAITAN

Mobile software development

React Native applications, Redux, automated testing, and quality engineering.

EDUCATION

Bachelor's Degree in Computer Science

UFLA

Postgraduate Degree in IT Management

IFSP

TEACHING & RESEARCH

Corporate instruction in data, Python, artificial intelligence, Power BI, and software development.

Research: RAG-based assistant integrated with Moodle using locally executed language models.

CORE TOOLKIT

React | TypeScript | Nx | Design Tokens | Storybook | React Aria | Next.js | FastAPI | Python

LANGUAGES

Portuguese - Native | English - Professional working proficiency
